AMERICAN TOURISTER

SINCE 1933

TRUSTED GLOBALLY SINCE 1933

In 1933 founder Sol Koffler put his life savings into starting a luggage company in Providence, Rhode Island. His aim was to create a tough suitcase that could sell for a dollar.

As air travel soared over the years, lighter and durable luggage became more in demand. With this demand, American Tourister continued to deliver great luggage into the market through experimenting with new materials to make the world's first super durable moulded luggage. In the 1960's American Tourister became the first company to 'flight test' their bags with flight attendants from major airlines. The company also responded to the shift in demand for softside durable cases that could withstand even the toughest quality critic, a gorilla.

In 1993, American Tourister was acquired by Samsonite, marking the union of the world's great luggage brands.

AMERICAN TOURISTER

SINCE 1933

THE BRAND NOW

American Tourister has built a reputation in Australia and over 120 countries for high-quality luggage backed by a 10-year truly global warranty, and at competitive prices.

Every year American Tourister invests millions of dollars into advertising across billboards, TV, cinema, digital, social media and PR, turning it into a leading brand in Australia.

For the first time ever, American Tourister is doing a collaboration with the iconic London-based design studio Eley Kishimoto to unleash a bright new range of backpacks. Bright pops of colour and patterns give instant expressions of youthful energy to delight travellers and commuters everywhere.

Living by the maxim "Print The World", Eley Kishimoto have always strived to create work with unique creative flair that rejects passing trends and fads, retaining a strong rooting in craft by screen printing product by hand in-house.

PRODUCT INFORMATION

DIMENSION

The dimensions shown are the outside dimensions, including handles, wheels, bottom glides, side pockets and other external components.

All volumes are measured in litres. These measurements are carried out in Samsonite laboratories using Samsonite measuring procedures.

Many luggage brands use a mathematical formula to calculate a bag's volume (Volume of bag = $H \times W \times D$ / 1000 litres). While logically sound, this method always overestimates volume. That's why at American Tourister, we use the Pellets Method. Compared to the mathematical formula, the Pellets Method provides the correct, realistic volume.

OTHERS	AMERICAN TOURISTER PELLETS METHOD	
		
VOLUME OF BAG = $(H \times W \times D) / 1000$ LITRES E.G. CABIN SIZE BAG = 43 LITRES	LOAD BAG WITH POLYPROPYLENE PELLETS	VOLUME OF BAG = VOLUME OF THE PELLETS E.G. CABIN SIZE BAG = 37 LITRES

Note that all measurements and weights are approximate. Colours may vary in image as opposed to actual product.
